

Twelve revenue functions stratified against thirteen agent capabilities — one hundred fifty-six cells of demand, density, and vapour.
Tabula cellularum agentiarum — functio per capacitatem — intensitas opportunitatis

[VII]Eval · observability[X]End-user surfaces

Vermilion-bordered cells are the fifteen highest OCQ scores in the matrix — opportunity × claimability × time-to-monetize. The cell of record is (9, G) at 19/20 — the agent-procurement gauntlet.
