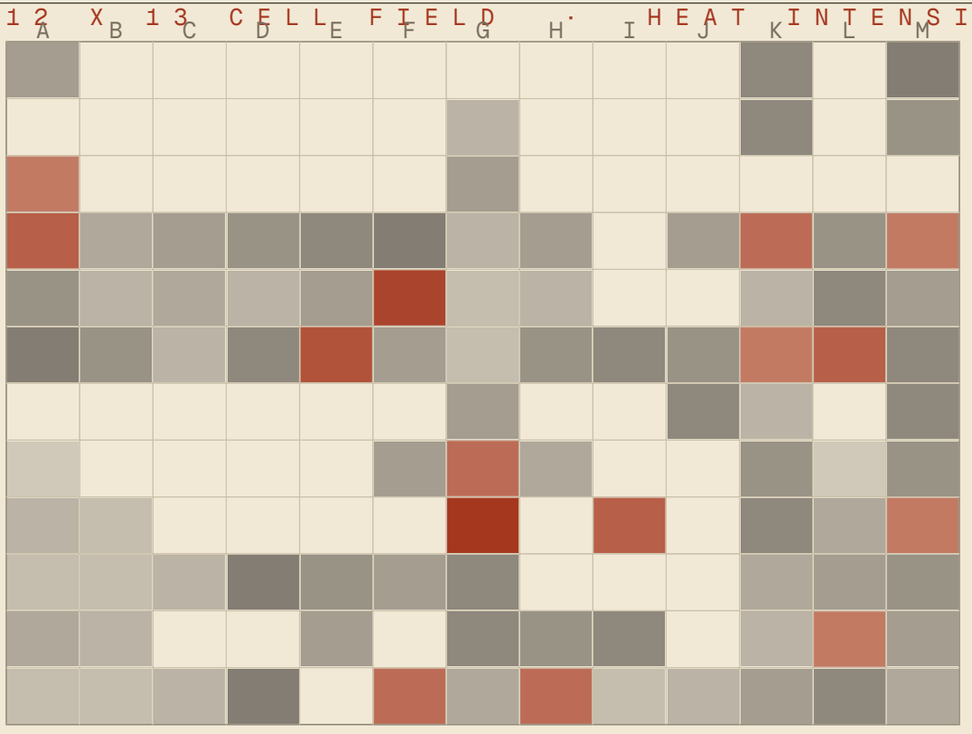
AGENTS GTM, SEEN WHOLE

The 12 × 13 cell field condensed · the seven-counterparty gauntlet · the seven Bets sequenced · the five Cruxes that re-rank everything.
Mercatura agenticum tota machina · ubi opus emat · ubi opus laboret

12 X 13 CELL FIELD · HEAT INTENSITY = OCQ



Vermilion = the fifteen highest-OCQ cells. Ink density = mid-tier scored cells.
Full-resolution version on Plate I of I.

THE FIELD-NARRATIVE LAG

The agent-GTM map of May 2026 is a field whose narrative still lags its facts. The vendors that headline the press cycle — synthetic-SDR, autonomous AE, agentic forecasting — sit in the matrix's vapour quadrants: high vendor-noise, low completion, negative net-revenue. The cells that carry actual durability — procurement-seam evidence packs, buying-committee graphs, deal-causation engines, persistent memory across multi-quarter cycles — are quiet, regulatorily forced, and largely unclaimed by name. The Top-15 above is the working list of where the decade's real agent-GTM equity will accrue. The Bets to the right are the operator's response.

Three structural truths anchor the page. First, the procurement seam is load-bearing: cell (9, G) at OCQ 19 is the cell of record, and seven counterparties at F1000 — InfoSec, Legal, Privacy, AI Governance, Procurement, Sponsor, Enterprise Architecture — must each be answered before any agent ships. Second, the L and M columns (memory and trajectory observability) are the matrix's most consistent gaps; they are where standalone craft survives the foundation-lab walk-up. Third, the K column (computer-use) is gated almost entirely on a single capability crux — OSWorld 65 percent — that flips a dozen cells inside one quarter. Sequencing matters.

THE SEVEN-COUNTERPARTY GAUNTLET · F1000B

Seven approver chairs in the F1000 procurement room. Each rejects on a different vector. An agent that does not pre-answer all seven does not ship.

01	INFOSEC CISO / GRC	Show me your indirect-prompt-injection defense — adaptive red-team, refresh cadence.	10 – 20 wks
02	LEGAL GC + AI Counsel	Hallucination liability, output-ownership, model-change notice, foundation-model passthrough.	8 – 16 wks
03	PRIVACY CPO / DPO	Surgical deletion across persistent memory, trajectory logs, and any fine-tuned weights.	6 – 12 wks
04	AI GOVERNANCE AI Council / CAO	Signed reproducible eval. NIST AI RMF map. Article 14 oversight design. FRIA template.	8 – 16 wks
05	PROCUREMENT CPO + AI Cat Mgr	Pricing benchmarkable; per-trajectory ceiling; viability through shakeout; exit story.	10 – 24 wks
06	SPONSOR CRO / CMO / VP CS	Will it hit my number; how fast to value; operator-translation layer to the line manager.	2 – 6 wks
07	ENTERPRISE ARCH CIO / Chief Arch	OAuth blast radius; reference-architecture conformity; on-call runbook; capacity at 10^5.	6 – 12 wks

THE SEVEN BETS · SEQUENCED · CONVICTION

Bet 1 first (claim Process Power) · Bet 2 second (collect equity at a power-holder) · Bet 3 third (compound advisory). Bets 4–5 fold as Bet 1 modules; Bet 6 is the distribution layer; Bet 7 the long-arc fallback.

1	PROCUREMENT OPERATING STANDARD ●●●●● 5/5	Open Playbook + 30 expert calls + Agent Procurement Rubric · the unclaimed flag at (9, G) OCQ 19
2	VERTICAL AGENT GTM ROLE ●●●●● 5/5	Hebbia / Sierra / Rogo NYC anchors · MBB feed-stock activated Feb-Apr 2026 · Q2-Q3 equity window
3	GATEWAY-ADJACENT ADVISORY ●●●●○ 4/5	Cloudflare AI Gateway primary · Kong / Pomerium secondary · pair-with positioning, not productized servers
4	FINOPS FOR TRAJECTORIES (FOLD) ●●●●○ 4/5	Per-trajectory FinOps audit · 12-mo window before AWS Bedrock auto-routing bundles · Bet 1 module
5	PERSISTENT MEMORY ARCHITECTURE ●●●●○ 4/5	L-column anchored: (6, L), (11, L), (12, L) · vendor-neutral architecture audit · Crux 5 dependent
6	OPERATOR TRANSLATION NEWSLETTER ●●●○○ 3/5	JTBD Job 5 distribution layer · Conclude-phase translation · cross-pollinate Bet 1 downloads
7	VC OPERATING PARTNER ●●●○○ 3/5	RAAIS / Betaworks / MAD background · principal-to-operator path · primary if Bets 1–3 stall

NYC VERTICAL-AGENT OPERATOR RANKING · ALE

Composite of equity asymmetry × power-rent × NYC anchor × Alex profile fit. F4 + F2 agree.

01	HEBBIA 0.20-0.40% · $250-350K · Mehta + MBB anchor · 2-quarter window	FinServ + MBB · NYC HQ · under-funded ratio 2.5-5% · highest equity asymmetry
02	SIERRA 0.10-0.25% · $300-400K · Schmidt + Taylor monthly NYC	Process Power on outcome pricing · brand-prestige + cleanest secondary-liquidity
03	ROGO 0.30-0.60% · $250-350K · Tekriwal + banker-fluent gate	Banker copilot · NYC HQ · most equity room of NYC named set

FIVE CRUXES · ANSWER-EVENTS THAT RE-RANK THE MATRIX

C1 ANTHROPIC ARR — 24Bvs30B · Q3 '26
vertical-agent valuation · equity windows compress 20-30% on close

C2 MCP COMMONS — holds vs silent fork · EOY '26
Cloudflare / Kong upside if forks; ecosystem unifies

C3 OSWORLD 65% — frontier crosses · Q3 '26
Microsoft Sales Copilot wins by default

C4 EU ART. 14 TEETH — enforcement · late '26
Bet 1 FRAM 5x range · paper-tiger collapses Bet 1 productized shape

C5 STANDALONE MEMORY — absorbed vs niche · H2 '26
Bet 5 is anchor; Crux already trending ni
